

PATENTED, COLLATED, STAINLESS STEEL,  
HIDDEN FASTENER DECKING SYSTEM

HIDFAST is the fastest and easiest  
hidden fastening system  
for virtually all decking types

- Easiest
- Fastest
- Invisible
- Strong
- Won't Rust

It's easy as:

A single package of 175 patented, collated, stainless steel fasteners will do 100 square feet of 6" decking when installed 16" on center.

- HIDfast can install 8 boards 8 feet long in a little over 3 minutes.
- Conventional 2.5 inch deck screws installed with a cordless driver, will install 1.5 boards in the same time as above.
- HIDfast can be over 5 times faster than conventional screws.
- HIDfast can do approximately 100 square feet in 10 minutes.
- HIDfast can be over 80% faster than a conventional installation.
- No visible fasteners in the surface of decking, for better appearance.
- No surface fasteners that may pop up.
- No surface penetrations that allow water in, causing rot, splitting and cracking.
- Boards lock to each other and to the joist for the strongest frame possible.
- Patented, strong worry free stainless steel fasteners.
- Collated fasteners for easy handling, and fast loading.
- Patent Pending pneumatic tool, for the fastest and easiest installation possible.

By far the **fastest** and **easiest** decking system you'll ever use!
